Author Index of Volume 23

Alleva, E., see Maestripieri, D. (23) 223
Anthony, C.D., see Ducey, P.K. (23) 181
Aubin, T.
Why do distress calls evoke interspecific responses? An experimental study applied to some species of birds (23) 103

Baudoin, C., see Feron, C. (23) 145
Bickmeyer, U., see Stiedl, O. (23) 125
Billing, A.E. and Smart, J.L.
Results from a signal detection analysis approach to the study of lasting effects of early life undernutrition on the behaviour of rats (23) 211
Bollweg, G.L., see Sparber, S.B. (23) 57
Bressers, M., Meelis, E., Haccou, P. and Kruk, M.
When did it really start or stop: the impact of censored observations on the analysis of duration (23) 1
Brodie, Jr., E.D., see Ducey, P.K. (23) 181
Brown, R.E. and Douglas, S.
The behaviour of adult male Long-Evans rats *Rattus norvegicus* toward pups of different ages (23) 89
Bulman-Fleming, B., Wahlsten, D. and Lassalle, J.M.
Hybrid vigour and maternal environment in mice. I. Body and brain growth (23) 21
Bulman-Fleming, B., see Lassalle, J.M. (23) 35
Bulman-Fleming, B., see Wahlsten, D. (23) 47

Cammaerts, M.-C., Verhaeghe, J.-C., Cammaerts, R. and Lesseux, R.
A hitherto unknown ethological factor in the ant *Tetramorium impurum* (Myrmicinae) (23) 193
Cammaerts, R., see Cammaerts, M.-C. (23) 193
Chevalet, P., see Lenoble, F. (23) 205
Cloarec, A.
Predatory versatility in the water bug *Diplonychus indicus* (23) 231
Corbara, B. and Errard, C.
The organization of artificial heterospecific ant colonies. The case of the *Manica rubida/Formica selysi* association: mixed colony or parallel colonies? (23) 73

Douglas, S., see Brown, R.E. (23) 89
Ducey, P.K., Anthony, C.D. and Brodie, Jr., E.D.
Thresholds and escalation of antipredator responses in the Chinese salamander *Cynops cyanurus*: inter- and intra-individual variation (23) 181

Errard, C., see Corbara, B. (23) 73

Feron, C., Baudoin, C. and Magnusson, M.S.
Effect of post-weaning social experience with normal females on the behaviour of adult male staggerer mice interacting with normal females (23) 145
Fontani, G., Vegni, V. and Voglino, N.
Self-directed behaviour and hippocampal electrical activity in rabbits living in a semi-natural environment (23) 173

Haccou, P., see Bressers, M. (23) 1

Kruk, M., see Bressers, M. (23) 1

Lassalle, J.M., Bulman-Fleming, B. and Wahlsten, D.
Hybrid vigour and maternal environment in mice. II. Water escape learning, open-field activity and spatial memory (23) 35
Lassalle, J.M., see Bulman-Fleming, B. (23) 21
Lassalle, J.M., see Wahlsten, D. (23) 47
Lenoble, F., Le Pape, G. and Chevalet, P.
Le transport de sa queue dans la gueule par la souris: étude préliminaire et recherche du sens (23) 205
Le Pape, G., see Lenoble, F. (23) 205
Lesseux, R., see Cammaerts, M.-C. (23) 193

Maestripieri, D. and Alleva, E.
Litter defence and parental investment allocation in house mice (23) 223
Magnusson, M.S., see Feron, C. (23) 145
Meelis, E., see Bressers, M. (23) 1
Melan, C. and Ungerer, A.
Positional choices and visual discrimination in non-delayed appetitive discrimination tasks in mice (23) 137
Messing, R.B., see Sparber, S.B. (23) 57

Smart, J.L., see Billing, A.E. (23) 211
Sparber, S.B., Bollweg, G.L. and Messing, R.B.
Food deprivation enhances both autoshaping and autoshaping impairment by a latent inhibition procedure (23) 57
Stiedl, O. and Bickmeyer, U.
Acoustic behaviour of *Ephippiger ephippiger* Fiebig (Orthoptera, Tettigoniidae) within a habitat of Southern France (23) 125

Trajano, E.
The agonistic behaviour of *Pimelodella kronei*, a troglobitic catfish from Southeastern Brazil (Siluriformes, Pimelodidae) (23) 113

Ungerer, A., see Melan, C. (23) 137

Vegni, V., see Fontani, G. (23) 173
Verhaeghe, J.-C., see Cammaerts, M.-C. (23) 193
Voglino, N., see Fontani, G. (23) 173

Wahlsten, D., Lassalle, J.M. and Bulman-Fleming, B.
Hybrid vigour and maternal environment in mice. III. Hippocampal mossy fibres and behaviour (23) 47
Wahlsten, D., see Bulman-Fleming, B. (23) 21
Wahlsten, D., see Lassalle, J.M. (23) 35
Whitehouse, M.E.A.
To mate or fight? Male–male competition and alternative mating strategies in *Argyrodes antipodiana* (Theridiidae, Araneae) (23) 163

Subject Index of Volume 23

Agonistic behaviour, (23) 113
Alternative mating strategy, (23) 163
Ant, (23) 193
Appetitive visual discrimination learning, (23) 137
Argyrodes antipodiana, (23) 163
Autoshaping, (23) 57

Behavioral development, (23) 231
Behavioral plasticity, (23) 231
Behavioural adaptation, (23) 35
Bird, (23) 103
Body weight, (23) 21
Brain-behaviour correlation, (23) 47
Brain weight, (23) 21
Brazilian cave, (23) 113

Cavefish, (23) 113
Censoring latency, (23) 1
Cognitive process, (23) 35

Development, (23) 35
Distress call, (23) 103
Distribution pattern, (23) 125

EEG, (23) 173
Ephippiger ephippiger, (23) 125

Food deprivation, (23) 57
Formica selysi, (23) 73
Formicidae, (23) 73
Fostering, (23) 35

Game theory, (23) 163

Heteropteran, (23) 231
Heterosis, (23) 35
Heterospecific mixed colony, (23) 73
Hippocampal theta rhythm, (23) 173
Hippocampus, (23) 173
House mouse, (23) 223
Hybrid vigour, (23) 21

Inbred strain, (23) 47
Insect, (23) 231
Interspecific communication, (23) 103

Latent inhibition, (23) 57
Likelihood ratio test, (23) 1

Litter defence, (23) 223
Litter size, (23) 223
Locomotory activity, (23) 125
Log-survivor, (23) 1

Male, (23) 89
Male–female interaction, (23) 145
Manica rubida, (23) 73
Maternal effect, (23) 35
Maternal environment, (23) 21
Mouse, (23) 137; (23) 205

Nest, (23) 205
Neurogenetics, (23) 47

Open field activity, (23) 47
Operant conditioning, (23) 211
Ovarian grafting, (23) 21; (23) 35

Parental care, (23) 89
Parental investment, (23) 223
Pimelodella, (23) 113
Population density, (23) 125
Position habit, (23) 137
Power, (23) 1
Predatory technique, (23) 231
Pup age, (23) 89

Rabbit, (23) 173
Rat, (23) 89; (23) 211
Rattus norvegicus, (23) 89
Reversal learning, (23) 137

Self-behaviour, (23) 205
Self-directed behaviour, (23) 173
Sexual competition, (23) 163
Signal detection analysis, (23) 211
Social experience, (23) 89; (23) 145
Social interaction, (23) 1
Social organization, (23) 73
Spatial memory, (23) 47
Spatial organization, (23) 73
Spider, (23) 163
Staggerer mice, (23) 145
Stridulatory period, (23) 125
Synergy, (23) 193

Tail-carrying, (23) 205
Tetramorium, (23) 193
Time of day, (23) 211
Trail, (23) 193
Undernutrition, (23) 211
Water bug, (23) 231
Wilcoxon two-sample test, (23) 1
